

ONE CARD ENDLESS POSSIBILITIES

TotalCard, a BadgePass product, is a powerful campus card system that allows colleges and universities to easily identify, validate and track students and faculty members. Students can use IDs for a variety of things both on and off campus including purchases, meal plans, attending events, door access, and more.

TotalCard is designed to work within each university to provide user-friendly account management, reporting and system administration. The system's modular design allows campuses to implement features and applications one at a time, in phases or all at once, depending on specific campus needs. The system can easily expand as your campus needs grow in the future. Contact us to learn more today.
